1 OVERVIEW

• 1.1 INTRODUCTION

City of Ekurhuleni (COE) has a mandate to promote the Smart City concept for transformation, growth, development and ensure that all Ekurhuleni's citizens derive sustainable benefit from technology development. The Information and Communication Technology (ICT) department has a responsibility to ensure that ICT goals are aligned to and support the City's mission and strategic objectives of becoming a Smart, Creative and Developmental City, and that optimum business value is realized from ICT related investment services and assets. Information and Communication Technology (ICT) is one of the key strategic enabling department within the City. It uses and leverage on the implementation of technology to enable the City to deliver services effectively and efficiently.

Figure 1: City Model

The municipal reference model has been set as a standard capability reference for all the departments. It illustrates the core, enabling/ support functions and its relevant systems, and the different stakeholders involved.

Governance and Monitoring is an overarching capability providing an oversight to all capabilities in the municipality.

Strategy capability is responsible for all planning and budget related capability for the CoE municipality. Evaluating existing business unit strategy based on the company's strategy and eliminate unwanted/unnecessary resources/elements and re-consider necessary resources to meet the overall company's strategy.

Core capability is all the municipality business processes mandated by the municipal act, to provide all constitutionally mandated services as prescribed by the Section 4 B and Schedule 5 Part B of the constitution.

Enabling/Supporting capability is all the transversal function within the municipality, that provide support to core process with a view to deliver the municipal mandated services.

Enabling Technology is all the systems/ applications used by the municipality to support internal business process, each capability layer will comprise associated applications.

• 1.2 mSCOA ERP

2 GENERAL SYSTEM INFORMATION

Property Letting is one of the revenue generating streams within CoE. Human Settlement Department (HSD) - Community Services and Relationship Management is responsible for managing leasing of city owned properties reserved for the elderly (old age homes, cottages, and flats) and receiving pension or grant, as well as family units for those who have other sources of income. The division is also responsible for men and women hostels which are under the care of the city. HSD does not have any system to support their leasing function. Most of the processes are still managed manually using spreadsheets which has negative effect on operations and the reporting thereof. There is a need to implement a fully integrated system, that will support the Property Lease Management capability end to end for HSD.

3 LEARNING REQUIREMENTS

It is expected that learners have the following pre-requisites:

- Computer literacy
- A good understanding of the Property Lease Management (PLM), Human Settlement system.

This User Guide is intended for the following audience:

- Senior Housing Specialist

4 LEARNING EXPECTATIONS

Understand System Concepts:

- System Login
- Review and Action Agreement of Lease
- Review and Action Terminations

5 LEARNING JOURNEY

6 KEY AREAS OF LEARNING

1	LOGIN TO PLM
2	REVIEW LEASE RENEWAL RECOMMENDATION
3	REVIEWING AND APPROVING AN AGREEMENT OF LEASE
4	REVIEW AND APPROVE TERMINATION NOTICE/ AGREEMENT
5	SENDING OUT A COMMUNICATION
6	LOG OFF

7 LEARNING OUTCOMES

At the end of this module, you will be able to:

- Navigate the Property Lease Management (PLM) Human Settlement system.
- Learn how to access information in the system and actioning applications.

8 KEY ICONS WITHIN THE LEARNING MATERIAL
